

Senior Environmental Manager
Indiana Department of Environmental Management

The IN Department of Environmental Management (IDEM) is seeking a person with senior GIS leadership for a position that will be responsible for project management, oversight, and coordination of GIS, information management, and technology-related projects. The position is responsible for assuring the quality and consistency of GIS products and processes. GIS training and training coordination will also be handled by this position. GIS-related services provided by this position include: GIS analysis, map production, GIS data queries and reports, providing technical assistance to GIS users, peer review of GIS projects, Standard Operating Procedure (SOP) and policy development and review. Information management-related services include providing technical support, project management, and data management. Technology-related projects include evaluating technology needs, developing technology-based solutions, training, and providing on-demand support.

The qualified candidate will have at the minimum six (6) years full-time professional experience in an Environmental or Environmental Public Health Field; or related experience. Accredited College Training may substitute for the required experience with a maximum substitution of four (4) years. (Concentration in Biology; Biophysics; Business/Public Administration; Cartography; Chemistry; Engineering; Environmental Affairs; an Environmental Science; Geology; Math; or related area required.)

Interested candidates can apply for the position at www.jobs.IN.gov. Job reference number is 552217. Please apply on or before March 3, 2008.
